Key Features

Login & Register:

Sign up by using your email and create a password. Upon email authorization, use those credentials to login and start learning! Home screen provides you multiple options such view content, upload a new lecture, access reports or see your accounts statistics.
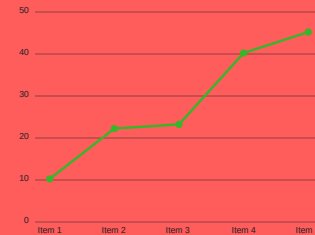

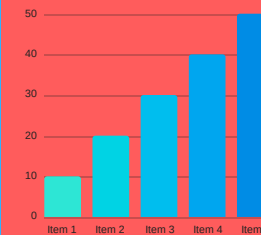

System Requirements:

The learning tool requires materials to be uploaded in order to process reports. Input options include text files that are parsed through the system and transformed into visual report formats. Have a video of a presentation or lecture? Upload that too and let the teaching tool help you learn.

Key Features

Output Makes a Difference:

The output changes the way important information is presented to the learner. The application will utilize machine learning to be able to take a given lecture or presentation and transform it into new figures that can serve as a teaching aid for various students. Our study has found that not every student learns the same way and hence we believe the Teaching Tool's output will help students overcome that boundary.

Learning has been geared towards linear learners for far too long. Optey's Teaching Tool will change that today!
